

STAPLES Center & Microsoft Theater

Employee and Operational Partners

EMS Awareness Training

Revision Date: September 2015

Components

1. Environmental Policy and Goals
2. Ecometrics
3. Sustainability Report
4. Environmental Management Systems (EMS)

Environmental Management System (EMS)

A written program that describes our environmental best practices and sets goals for things we can improve.

What is my role in the EMS?

1. Be aware of the EMS and where you can get more information
2. Be aware of AEG 1EARTH & our Environmental Policy, and put them into action on the job and help us achieve our goals of reducing electricity, water and waste.
3. Be aware of how the EMS relates to your job, and engage employees and guests in our environmental efforts by encouraging recycling and other environmental behavior

Environmental Policy

- Signed by Dan Beckerman
- Commits AEG to:
 - Continual improvement
 - Compliance with environmental regulations
 - Setting and achieving environmental objectives
 - Listening to the concerns of employees, guests and other stakeholders

SC & MT

2013-2015 Environmental Goals

Energy and Climate

- Reduce Electricity Consumption by 12%
- Reduce Fuel Consumption

Recycling and Waste Diversion

- Achieve 75% Diversion Rate

Water Conservation

- Reduce Water Consumption by 10%

Sustainable Purchasing

- Increase sustainable consumable goods and tech

Education and Emergency Preparedness

- Increase environmental education to 100%
- Increase sustainable event management
- Increase emergency preparedness to 100%

Energy Conservation Guidelines

2013-2015 Goal: Reduce electricity consumption by 12%

Initiatives By 2015

- Continue to implement LED lighting retrofits in both venues & parking garage where possible
- Develop and distribute a Building Lighting Standard to guide lighting purchases
- Pre-set all office equipment (computers, printers etc.) to energy saving mode
- Improve communication of energy-saving practices & procedures during events and in offices (including tenant offices spaces)

Water Conservation Guidelines

2013-2015 Goal: Reduce water consumption by 10%

Initiatives By 2015

- Identify water conservation procedures around sink use in kitchens
- Reinforce proper training and guidelines for use and regulation of cooling towers
- Source and recommend new water-saving fixtures & products for both venues

Solid Waste Guidelines

2013-2015 Goal: Achieve 75% Diversion Rate by 2015

Initiatives By 2015

- Improve recycling program for employee areas (offices, kitchens, break rooms), and add composting to office kitchens where space allows
- Purchase reusable mugs and glasses for employee kitchens
- Increase post-event donations of perishable food & promotional items/giveaways left behind by events
- Maximize food waste composting program
- Increase awareness of and participation in Universal and E-waste recycling for employees, patrons, clients & partners

Thank you!

For more information:

- Reference handouts or ask your supervisor
- Ask your supervisor about your department specific goals
- Review the employee website:
